- May directly damage communications...

What are “Extreme Events”

- Covers Natural as well as man-made
- May directly damage communications...
... cause serious congestion...

What are “Extreme Events”

- Covers Natural as well as man-made
- May directly damage communications...
... cause serious congestion...

An aerial photograph of a coastal town. A river flows through the town from the top left towards the center. The town is densely packed with buildings, mostly in shades of brown and grey. To the right of the town is a large body of water, possibly a bay or a large river mouth. The water is a dark, muted green color. The overall scene suggests a coastal urban area that might be vulnerable to extreme events like flooding or storms.

What are “Extreme Events”

- Covers Natural as well as man-made
- May directly damage communications...
 - ... cause serious congestion...
 - ... or provide a challenge in provision.

Segment Overview

- **Keynote address - Setting the scene**
- **Session 1 - Initial Response & Recovery**
 - from hours to a few days
- **Session 2 - Recovering to normal**
 - from a few days to several months
- **Session 3 - Preparing**
 - the never ending mission...

An aerial photograph of a coastal region, showing a large body of water on the left and a complex network of landmasses and channels on the right. The land is a mix of green and brown, suggesting a mix of vegetation and possibly some cleared or damaged areas. The water is a deep blue-grey color.
