A composite image featuring a multi-level highway interchange at night, illuminated by streetlights. The sky is dark and filled with a dense field of stars, suggesting a starry night or a digital representation of a network. The highway structure is a prominent, curved concrete element that dominates the right side of the frame.

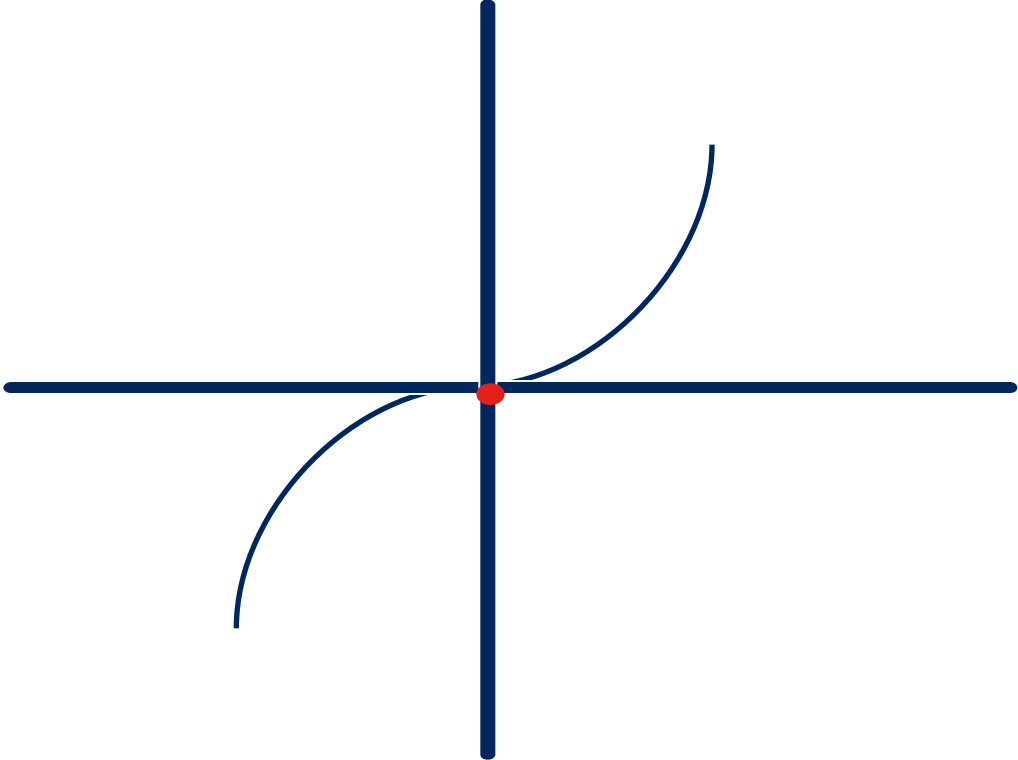

On the brink of
a Networked society

NETWORKED UTILITIES

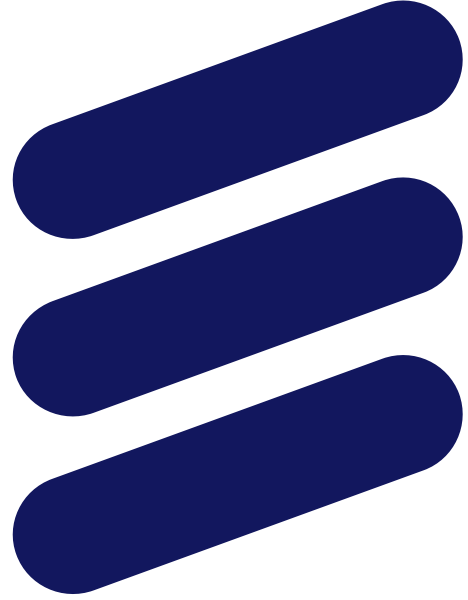

Vision

In the networked society **people, knowledge, devices, and information** are networked for the growth of society, life and business.
